Terminology : The terminology used for describing motion pictures varies considerably between British and American English. In British usage, the name of the medium is film. The word movie is understood but seldom used.78 Additionally, the pictures plural is used semi-frequently to refer to the place where movies are exhibited, while in American English this may be called the movies, but it is becoming outdated. In other countries, the place where movies are exhibited may be called a cinema or movie theatre. By contrast, in the United States, movie is the predominant form. Although the words film and movie are sometimes used interchangeably, film is more often used when considering artistic, theoretical, or technical aspects. The term movies more often refers to entertainment or commercial aspects, as where to go for fun evening on a date. For example, a book titled How to Understand a Film would probably be about the aesthetics or theory of film, while a book entitled Lets Go to the movies would probably be about the history of entertaining movies and blockbusters.

Before the advent of digital alternatives, the cost of professional film equipment and stock was also a hurdle to being able to produce, direct, or star in a traditional studio film. But the advent of consumer camcorders in 1985, and more importantly, the arrival of high-resolution digital video in the early 1990s, have lowered the technology barrier to film production significantly. Both production and post-production costs have been significantly lowered in the 2000s, the hardware and software for post-production can be installed in a commodity-based personal computer. Technologies such as DVDs, FireWire connections and a wide variety of professional and consumer-grade video editing software make film-making relatively affordable.

Warner Bros. followed Disney by announcing the postponement of the rest of their

upcoming slate on March 24. Tenet was pushed from July 17, 2020, to July 31, 2020, then August 12, 2020 before it was held up indefinitely.108 Wonder Woman 1984 was pushed to August 14, 2020, then to October 2, 2020, and then again to December 25, 2020, with Scoob!, In the Heights, and Malignant being delayed indefinitely. This resulted in Scoob! not having a theatrical release in North America and that film went straight to video on demand, while In the Heights moved to its new release date of June 18, 2021.109 Prior to this, on March 19, Universal and Illumination announced that Minions: The Rise of Gru had been pulled from its intended release date of July 3, 2020, not only due to the pandemic but also due to the temporary closing of its French Illumination Mac Guff animation studio in response to the pandemic, which would leave the films animation to be unfinished on its original date.110 On April 1, 2020, the film was rescheduled for July 2, 2021 taking the planned release date of Sing 2, a year after its original date.111
